Digital Library of Amateur Radio & Communications

The Digital Library of Amateur Radio and Communications is a library of materials and collections related to amateur radio and early communications. The DLARC is funded by a significant grant from [Amateur Radio Digital Communications](#), a private foundation, to create a digital library that documents, preserves, and provides open access to the history of this community.

4. Reduce the Peak to Average Ratio PAPR in OFDM MIMO Systems

Peak to Average Ratio (PAPR) Reduction Technique in OFDM-MIMO System- A Review

ABSTRACT

Orthogonal Frequency Division Multiplexing (OFDM) is an new method for fourth generation wireless communication. MIMO-OFDM has become a promising candidate for high performance 4G & 5G broadband wireless communications. However, one main of MIMO-OFDM is the high peak-to-average power ratio (PAPR) of the transmitter's output signal on different antennas. In this paper, we present a new noble SLM PAPR reduction techniques such as selective mapping technique and Partial transmit sequence techniques and shows which of these PAPR reduction techniques are more effective to reduce PAPR in OFDM- MIMO.

General Terms

SLM, PAPR, OFDM, MIMO, 4G, 5G, ISI

KEYWORDS: OFDM, OFDM, SLM, PAPR, PTS, MIMO, ISI

3. You Can't Make Love by Wireless

GEORGE GROSSMITH & P. G. WODEHOUSE
(1847-1912 & 1881-1975)

You Can't Make Love by Wireless

(Song lyric, 1923)

You can't make love by wireless;
It's like bread without the jam.
There's nothing girls desire less
Than a cold Marconigram
For it's something you can't speak to
From a someone you can't see
It's like a village church that's spireless
Or a little home that's fireless
Or a motor car that's tyre-less
(Or a Selfridge's that's buyer-less)
And it isn't any good to me.
